

PrintView

Thermal printer and consumables management

Innovation, expertise & efficiency since 1888

Peacock Bros.

PrintView

PrintView is a software solution that provides visibility and remote management of all the thermal printers and consumables across your business in real time from one centralised dashboard.

Compatible with multiple leading brands this fully scalable remote management solution caters for small business with one location through to multi-site, enterprise-level organisations.

Key features

Auto Discovery and Grouping

PrintView can quickly detect and display the label printers on your network, identifying and connecting to printers automatically. Printers can be assigned with friendly names and grouped according to site, department or location, all from the one easy to use dashboard.

Real-Time Alerts and Management

Easily check the status of your printers, with auto alerts showing common printer errors and the ability to configure printers remotely.

Reporting and Analysis

Run real time reports to identify which printers are working the hardest to optimise output. Faults can be quickly identified and actioned, even when the printer is at another site.

Consumables Management

PrintView records the number of labels being printed and allows you to set minimum stock level alerts to ensure you will never run out of labels. Automatically replenish label stock with a direct link to the Peacocks buy online portal.

Proactive Maintenance

PrintView constantly monitors the health status of the printers and provides information required to make strategic decisions around resource deployment to ensure the right printer is in place for peak time output.

Configuration and installation

PrintView can be configured as an on-premise solution, or hosted in the cloud as a secure SaaS model. Our experienced team can install PrintView and offer full training and support services.

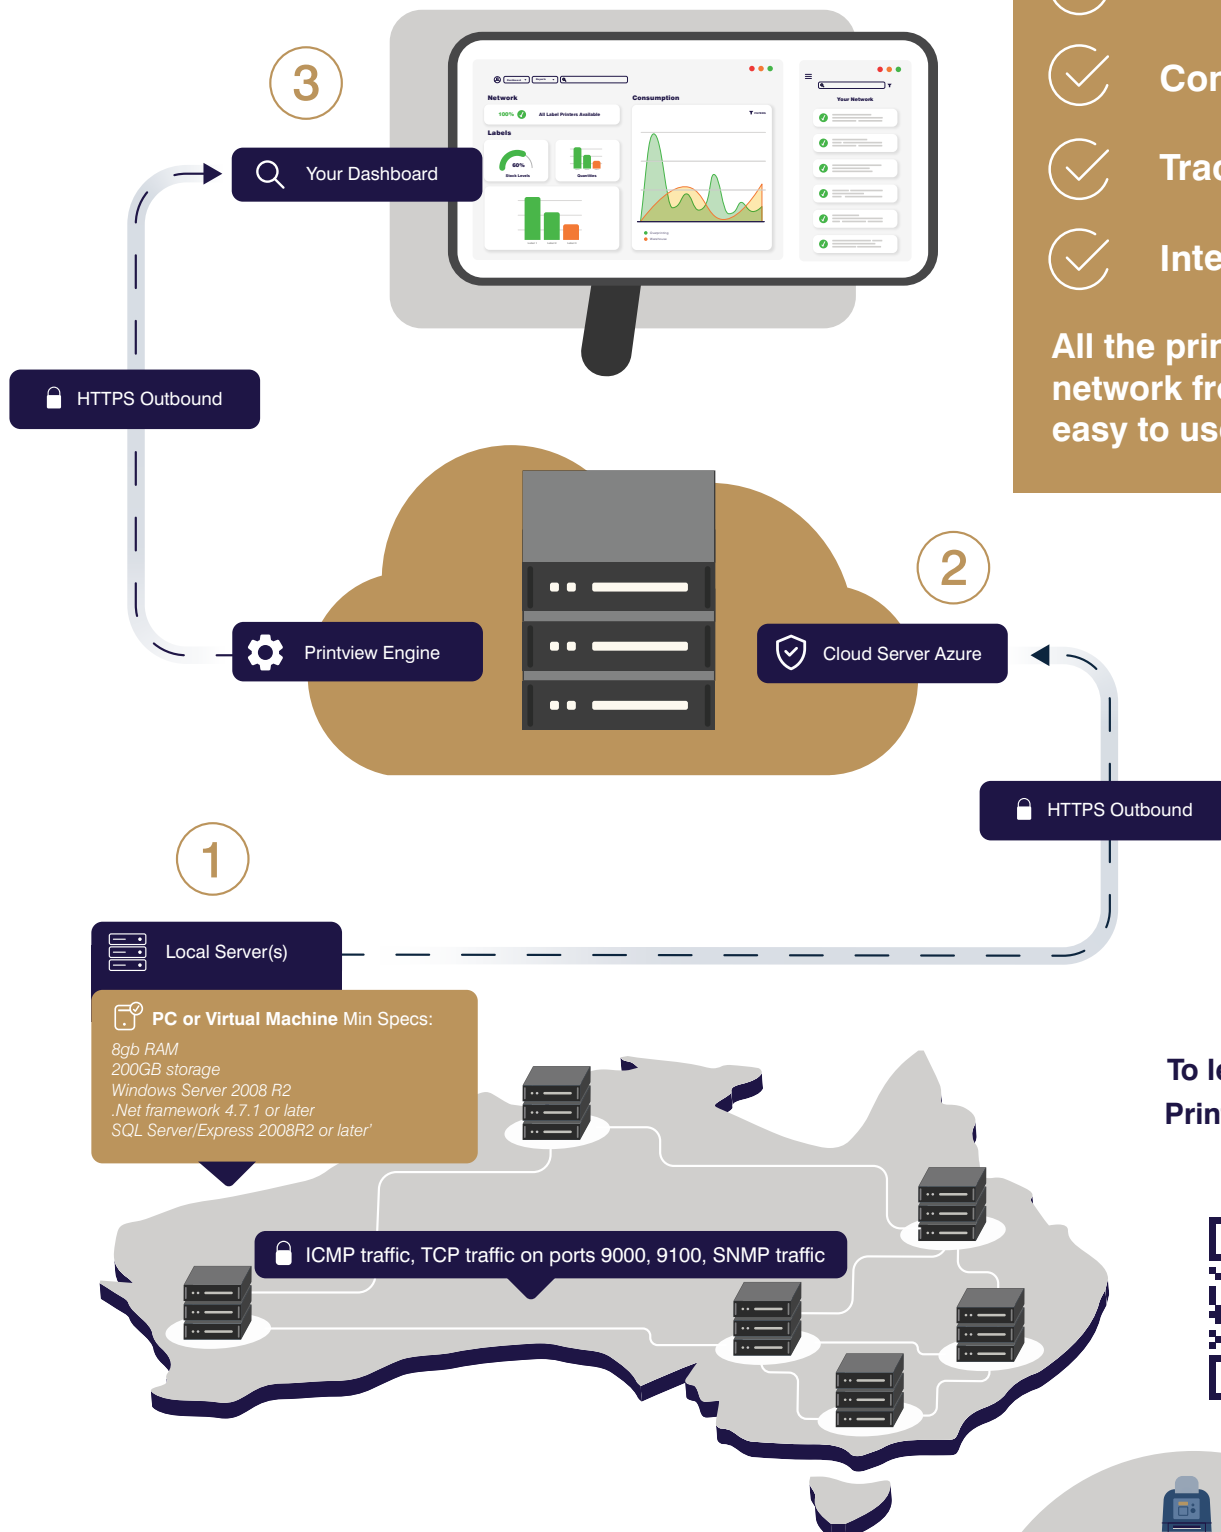

From local or cloud hosted servers to your personal dashboard

PrintView

- ✓ Detect
- ✓ Configure
- ✓ Track Consumption
- ✓ Interrogate

All the printers in your network from the one easy to use portal

Gain visibility and control of the printer assets and consumables in your business and let PrintView drive operational efficiencies in your workplace.

In 1888, brothers Ernest and Charles Peacock opened a small general printing business on Collins Street in Melbourne. Later that year Ernest took over the business, and in the years to follow Peacock Bros. would grow into one of the largest manufacturers and suppliers of high-quality printed labels, tags and packaging solutions across Australia and New Zealand.

Today, we are an organisation at the forefront of innovation with a longevity that can be attributed to our collaborative, team-based approach to delivering solutions. Continually evolving, we have now become a market-leading provider of supply chain solutions across the region.

Australian owned and operated, we pride ourselves on going above and beyond the expectations of our 12,000+ customers. We've done it for 130+ years and counting, so what can we now do for you?
